

Laminate Panels

Morland offers a range of decorative surfaces from the leading producers in Europe. Working with Abet, Arpa, Egger, Polyrey and Wilsonart we have access to an extensive choice of finishes. From flooring grade HPL to flexible continuous pressure laminate we have a decorative surface to fit the purpose.

Our lamination process always meets D3 of EN204 and is suitable for MR, Class 1 and O flame retardant MDF or Chipboard.

We ensure the materials are conditioned for 48 hours before bonding. We have de-gauzing and brushing equipment to ensure that all dust, particles and static are removed prior to lamination.

This allows us to produce stunning high gloss panels. Our throughfeed press allows us to produce panels up to 3660mm long.

Combining the right surface and core; purchasing directly from the manufacturer; using a proven lamination process; operating vigilant quality management system delivers value.

1.2mm flooring grade laminate bonded to 9mm exterior MDF to produce a bespoke floor panel system for a severe contract application.

We deal directly with the MDF mills and import our own plywood from our long standing supply partners around the globe.

Our environmental policy prohibits the use of illegally logged timber and supports sustainable forestry. Morland has both FSC and PEFC certification for the purchase, processing, sales and distribution of certified timber.

Our panels are used in a range of applications including

-  Worktops and Furniture
-  Flooring and Ceiling Panels
-  Feature Wall Panels
-  Lightweight Panels
-  Showerwall
-  Shopfitting
-  Fire-rated door blanks
